

A MESSAGE FROM SENIORS WORKING TOGETHER-COMMITTEE

Insight . . . please see the attached. This is a redacted copy of today's SWT-Committee Report to Marion County Utilities and the Florida Department of Environmental Protection. This is an excellent example of what is occurring throughout Oak Run, concerning our sewer system, sewer gases released into the environment, and our neighborhoods, identifying locations throughout our community. This report is not limited to only these areas. The reports vary from day to day. I posted this report to help residents realize the magnitude of the situation and the effect to all neighborhoods. Over the next few days, residents will be receiving a notice from the Past Presidents Committee, in reference this subject. Please take a moment and review this notice, and get involved. It takes less than a minute to make a report when you detect odors. Your call is important to the overall effectiveness of a permanent resolution. This is a Community problem and requires Community involvement. Smell it call: 352-783-2185.
